Section 2: Storm seasons - Time to gaze auroras

Heatmap & radial chart to show best months to seek for auroras

Dual axis line chart to show relevance between Solar activity & magnetic field (kp index)

Section 3: Case study: The relevance between auroras and geomagnetic storms ~~thru~~ through 2024 May superstorm

Dot map showing Aurora seen report
& proportional symbol

Scatter showing Geomagnetic K_p index vs aurora visibility

Dumbbell chart comparing actual experiences vs statistical record

Section 4: Meteorites

Dot map showing meteorite landings with size encode radiated energy

Dot map categorizes meteorite recoveries by material with size encode Mass

Scatter to show the power-law: the inverse proportion between the energy and the frequency.

Section 5: Eclipses

Timeline to show eclipses events with future events predicted, categorized by color

Bar chart comparing types of eclipses to examine the rarity of eclipses
